Dr “Jay” Jayanthi Subramanian  
Vice President, Solution and Practice Development (Healthcare)  
Financial Services Strategic Business Unit

Jay is responsible for Capgemini’s solution development, innovation and thought leadership strategies to enable healthcare GTM both within current and new client portfolio. Her focus on healthcare practice and solution approach includes digital, insights, data and AI driven offerings.

Jay is a clinical practitioner with 27+ years of hands on patient care expertise, regulatory knowledge, technology and data experience enabling CXO community across healthcare, life sciences and insurance industry to evolve, strategize and implement future proof solutions. She has been a speaker in AHIP and other healthcare conferences and has lead several design thinking sessions. Prior to Capgemini, she was with Infosys Consulting leading their healthcare practice and grew from zero to several million-dollar portfolio enabling GTM success.

Jay holds a Master’s in health sciences and a Doctorate in Business Administration in Healthcare Management and Leadership. In addition, Jay is an ICCDP certified trainer for Alzheimer’s and Dementia and Dschool certified Design Thinker. She is also on the board of select healthcare start-ups.

# CareClix

S. John Korangy, MD, MPH

CareClix

CEO

Dr. Korangy is a Board Certified Neuroradiologist who has spent his entire career involved with developing and implementing telehealth systems. As a founder of CareClix he developed one of the most robust virtual health platforms in the world with the goal of improving access to quality, cost effective health care services for patients. Considered a pioneer in virtual health, he has helped formulate standards and guidelines for the practice of telemedicine and has authored papers on telemedicine and the implementation of virtual health on a global basis. Dr. Korangy speaks nationally about utilizing and deploying virtual health across the practice of medicine.
